

TOXIC

her homeopathy

Why have I put together this document?

In recent weeks, the FDA has finalized guidelines to change the status of homeopathic remedies as "unapproved drugs." This gives the agency power to remove any homeopathic products (currently legal!) at any time.

You can learn more & get involved here:

<https://homeopathychoice.org/the-threat-to-homeopathy/>

I don't believe there's need for panic and I don't believe the FDA will remove all homeopathic products overnight (haven't yet anyways!). BUT many homeopaths, including myself, believe that if they go after anything, it will be the "toxic" remedies first. It's also important to note that yes this currently only involves the United States, but I believe Health Canada will soon follow.

The following is a list of homeopathic remedies that are toxic (straight from nature). Once prepared homeopathically, through a series of dilutions and succussions, the homeopathic remedies using these substances are safe to use.

The most common potencies for these remedies for at home use are 30C & 200C. At these potencies, there is no original substance left in the homeopathic remedy. Just the energetic imprint that the substance left behind.

These are not ALL of the homeopathic remedies made from toxic substances, but these are the ones I believe are important to have in your home kits. If you have a remedy & that remedy becomes unavailable, you can make more of that remedy! If it comes to that, you better believe I'll show you how.

If possible, I would own these remedies in 30C & 200C. I realize that is a lot of money to spend on remedies at one time, but like I said, I do not believe we need to panic. Start with a few and make your way through the list if you so desire, buying ones that are especially important to you and your family first. I personally would buy 30C first, then move onto 200C in your favourites.

If you have family or friends that use homeopathy, you could consider splitting up the lesser known/used remedies so that someone you know has it just incase. If there does come a time when you can no longer purchase it, you can use that one remedy to make enough for anyone interested.

I hope this is a help to you! Share with all you think might benefit from this information.

TOXIC

1. Aconitum napellus - monkshood
2. Antimonium crudum - antimony sulphide
3. Antimonium tartaricum - antimony potassium tartrate
4. Arnica montana - leopard's bane
5. Arsenicum album - arsenic
6. Belladonna - deadly nightshade
7. Bryonia - white bryony
8. Camphora officinarum - camphor
9. Causticum - lye
10. Cicuta virosa - water hemlock
11. Cocculus indicus - moonseed
12. Conium - poison hemlock
13. Crotalus horridus - venom of the timber rattlesnake
14. Digitalis purpurea - foxglove
15. Dulcamara - bitter-sweet
16. Elaps - coral snake
17. Eupatorium perfoliatum - boneset
18. Gelsemium sempervirens - false jasmine
19. Glonoinum - nitroglycerin
20. Ignatia amara - seeds of the st ignatius bean tree
21. Kali bichromium - potassium bichromate

TOXIC

22. Lachesis - American bushmaster snake
23. Mercurious solubilis - quicksilver
24. Nux vomica - seed of the poison-nut tree
25. Opium - opium poppy plant
26. Petroleum - crude oil
27. Phosphoricum acidum - phosphoric acid
28. Phosphorous - phos
29. Phytolacca decandra - American pokeweed
30. Pyrogenium - artificial sepsis
31. Radium bromatum - radium bromide
32. Sabina - savine
33. Sanguinaria canadensis - bloodroot
34. Secale carnutum - ergot
35. Silica - silica
36. Spigelia anthelmia - west indian pinkroot
37. Spongia tosta - roasted sponge
38. Staphysagria - delphinium
39. Stramonium - thorn apple
40. Symphytum - comfrey
41. Tabacum - tobacco
42. Veratrum album - white hellebore

potentially TOXIC

These substances when found in nature may have the potential to be toxic. Probably not a big threat but included nonetheless.

1. Bellis perennis - daisy
2. Cantharis - Spanish fly
3. Caulophyllum thalictroides - blue cohosh
4. Cimicifuga racemosa - black cohosh
5. Colocynthis - bitter cucumber
6. Ferrum metallicum - iron
7. Histaminum - histaminum hydrochloricum
8. Ipecacuanha - ipecac-root
9. Ledum - marsh tree
10. Lycopodium - club moss
11. Passiflora incarnata - passion flower
12. Podophyllum - may apple
13. Pulsatilla - pasque flower
14. Ruta graveolens - rue
15. Sabadilla - feathershank

PHARMACIES TO PURCHASE FROM

Below are my favourite pharmacies to order from. If you have a favourite, by all means order from there. Just a note that you will not find every remedy at every pharmacy, except Helios. They've got everything.

Another note. Only buy from trusted, reputable pharmacies.

You can find cheaper remedies online from for example India, but they do not have the same regulations or standards when it comes to preparation. Could be great, but also could not be.

1. boironUSA.com or boiron.ca
2. ollois.com - use code Jill15 for 15% off - I will earn 15% at not additional expense to you.
3. helios.co.uk
4. ohmpharma.com
5. iandeorganics.com
6. hahnemannlabs.com
